Filed: December 22, 1999

Docket: 884.181US1

Title: CONTROL OF STREAMING OF SIGNALS IN A LOCAL AREA NETWORK

AMENDMENT AND RESPONSE UNDER 37 CFR § 1.111

Commissioner for Patents
Washington, D.C. 20231

RECEIVED
JAN 15 2003
Technology Center 2100

Applicant has reviewed the Office Action mailed on October 3, 2002. Please amend the above-identified patent Application as follows.

In the Drawing

Enclosed are copies of Figures 1 and 2 of the Drawing, showing the following proposed amendment to Figures 1 and 2 in red ink: a text label for element 100 and expanded labels for block 202.

In the Specification

On page 1, please delete the Title, and substitute therefor —VOICE DATA STREAMING CONTROL IN A NETWORK—.

Please amend the paragraph beginning at page 9, line 9, as follows:

Although specific embodiments have been illustrated and described herein, it will be appreciated by those of ordinary skill in the art that any arrangement which is calculated to achieve the same purpose may be substituted for the specific embodiment shown. This application is intended to cover any adaptations or variations of the present invention. For example, signal streaming controller 114 can be implemented in software or hardware or a combination of both software and hardware. Further, modes other than the modes shown in [Figure 1] Table 1 can be used in a specific application in order to allow a number of communication devices to cooperate in order to coordinate sink and source for a voice stream. Further, although the specification describes a mechanism that works with voice data, it is
